Story Title *
Check Account Balance
Summary *
As a bank customer I want to view my real-time account balance So that I know my a
Description
Additional description (optional)...
Acceptance Criteria *
and available balance (post-holds) are displayed
- Given I have multiple accounts, when I view the dashboard, then balances for all linked accounts are shown separately
- Given the balance fails to load, when there's a network/service error, then a retry option and last-synced timestamp are shown instead of a blank/incorrect value

EXPECTED RESULT
TC-001
Verify Current and Available Balances for a Single Account
Positive
Current balance shows $1,500.00 and available balance (post-holds) shows $1,300.00 accurately.
TC-002
Verify Multiple Linked Accounts Display Balances Separately on Dashboard
Positive
Each linked account is listed distinctly with its own independent current and available balance without aggregation or overlapping.
TC-003
Verify Error Handling and Retry Option on Network/Service Failure
Negative
No blank or incorrect ($0.00) balances are displayed; a user-friendly error message, the 'Last synced at 10:15 AM' timestamp, and a functional 'Retry' button are displayed.
TC-004
Verify Successful Balance Recovery via Retry Button
Positive
The error state clears, loading indicator is shown briefly, real-time balances load successfully, and the last-synced timestamp updates to the current time.
TC-005
Verify Balance Display with Active Pending Holds
Edge
Current balance reflects ledger total ($500.00), while available balance correctly subtracts pending holds ($425.00).
TC-006
Verify Account Balance Display for Zero and Negative
Edge
Account A displays $0.00 clearly; Account B displays -$45.50 (or ($45.50)) highlighted with appropriate

EXPECTED RESULT
TC-001
View Current Balance and Available Balance on Account Overview
Positive
Both current balance and available balance (post-holds) amounts are shown correctly and prominently.
TC-002
Display Separate Balances for Multiple Linked Accounts
Positive
All linked accounts are listed separately, each showing its own balance figures.
TC-003
Show Retry Option and Last-Synced Timestamp When Balance Load Fails
Negative
Instead of a blank or incorrect balance, a 'Retry' button is offered and the most recent sync timestamp (e.g., 'Last synced at: 2025-09-25 14:32:10') is displayed.
TC-004
Unauthenticated Users Cannot View Balance Data
Authorization
System redirects to login page or shows a 'Please log in' message; no balance values are displayed.
TC-005
Correctly Show Available Balance After Holds Are Applied
Positive
The 'Available Balance (Post-Holds)' reflects the reduced amount after subtracting held funds, while 'Current Balance' remains unchanged.
TC-006
Page Response Time and Stability Under Normal Load (Non-Functional)
Non-Functional
Page loads within acceptable timeframe (e.g., < 2 seconds) and displays balance data without crashes or errors.

EXPECTED RESULT
TC-001
View balance for a single account
Positive
Current balance and available balance for the logged-in account are displayed and match the values returned by the backend service
TC-002
View balances for multiple linked accounts
Positive
Each linked account is listed separately with its correct current and available balances
TC-003
Prevent balance view without authentication
Authorization
User is redirected to the login page or shown an error message prompting authentication
TC-004
Handle session expiration when accessing balances
Authorization
A session timeout notification is displayed and the user is redirected to the login screen
TC-005
Display zero balance correctly
Edge
Current balance and available balance both show $0.00 with no error or placeholder
TC-006
Display very large balance with proper formatting
Edge
Balance is displayed as "$9,999,999,999.99" (comma separators, two decimal places) for both current and available fields
